

PROJECT DESIGN PHASE

Proposed Solution Template

Date	18 June 2026
Team ID	
Project Name	ShopEz (MERN Full-Stack Application)
Student Name	ALLADI MANJUNADH (alladimanjunadh07@gmail.com)
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement	Contemporary e-commerce platforms frequently encounter issues like high response times, non-responsive mobile views, and overly complicated admin tools. These bottlenecks result in decreased user engagement and logistical inefficiencies in stock handling.
2.	Idea / Solution description	ShopEz leverages the modern MERN stack to provide a streamlined, single-page shopping environment. Key highlights include live search functionality, reliable cart persistence, smart category sorting, and an integrated dashboard for centralized order and inventory oversight.
3.	Novelty / Uniqueness	• Unified JavaScript architecture using MERN for optimized performance. • Seamless media handling integrated with Cloudinary services. • Fluid UI tailored for diverse segments including Men, Women, and Kids. • Precise administrative tools for comprehensive order management.
4.	Social Impact / Customer Satisfaction	Improves digital accessibility by offering a secure and user-friendly interface. It boosts buyer trust through a simplified one-click checkout process, real-time availability status, and transparent access to purchasing records.

S.No.	Parameter	Description
5.	Business Model	• Revenue from direct sales and small transaction processing fees. • Tiered subscription models for premium vendor access. • Fees associated with highlighted or sponsored product placements.
6.	Scalability	The NoSQL foundation of MongoDB allows for effortless horizontal expansion. Future roadmaps involve broadening the platform into a multi-vendor marketplace, deploying AI for custom user suggestions, and supporting global currency payments.
