Customer Problem Statement Template:

Formulating a clear problem statement is vital for empathizing with the end-user. This process helps in focusing on key functionalities to build software that truly solves user pain points. By defining these statements, developers can better understand user interactions and create more effective technical solutions.

I am	A standard shopper or an inventory manager.
I'm trying to	Find products quickly or manage e-commerce stock.
but	Legacy sites are often slow and hard to browse.
because	The underlying tech lacks a modern, integrated MERN setup.
which makes me feel	Frustrated and disconnected from the platform tools.

Example Entry:

[I am: A Parent] [Trying to: Buy kids clothes] [But: The site crashes] [Because: It is not scalable] [Feel: Annoyed]

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Mobile-first shopper	Browse/Buy new fashion items	Filters are sluggish on phones	Frontend isn't optimized for mobile performance	Annoyed and unlikely to return
PS-2	Store Admin	Update item stock levels	Manual edits take too long	The dashboard lacks bulk update features	Overwhelmed and inefficient
