

User Acceptance Testing (UAT) Documentation

Submission Date	June 19, 2026
Team ID	
Project Name	ShopEz
Department	Computer Science Engineering

Project Overview

Student Name	Alladi Manjunadh
Application Type	Full Stack MERN-Based E-Commerce Application
Contact Email	alladimanjunadh07@gmail.com
Tech Stack	MongoDB, Express.js, React.js, Node.js
Testing Window	June 15, 2026 – June 18, 2026

Evaluation Scope

- Core Features:** User authentication, product catalog browsing, cart management, and secure checkout processing.
- Primary Goals:** Validating seamless MERN integration and ensuring front-end responsiveness across diverse user journeys.

Testing Infrastructure

- Environment:** Locally hosted Node.js server with MongoDB Atlas cloud connectivity.
- Access Point:** http://localhost:3000 (React Frontend) / http://localhost:5000 (Express Backend)

Functional Test Cases

ID	User Case Scenario	Execution Steps	Predicted Outcome	Result
TC-001	System Access and Login	1. Load homepage 2. Submit credentials 3. Verify redirect	Successful dashboard entry	As predicted
TC-002	Product Selection	1. Browse items 2. Add to cart 3. Update quantity	Cart items sync with DB	Items saved

Issue Tracking Log

Log ID	Issue Detail	Severity	Lifecycle	Technical Feedback
BG-001	Initial image load delay on mobile views	Medium	Resolved	Implemented lazy load catalog assets

Approval Signature: _____

Quality Assurance Guidelines:

- Verify that both edge cases and standard user paths are fully documented.
- Document iterative feedback to facilitate future MERN stack optimizations.
- Maintain precise logs for severity levels and resolution workflows.
- Ensure stakeholder verification is obtained prior to final deployment phases.
